Professional Summary

Data Analyst fresher with hands-on experience in SQL, Python, Power BI, and MySQL, gained through a Data Science internship and real-world analytics projects. Skilled in data cleaning, exploratory data analysis (EDA), dashboard development, and machine learning. Passionate about transforming raw data into actionable insights, with a strong interest in the banking and product analytics domain.

Technical Skills

- **Data Analysis & Programming:**
- SQL (Joins, Aggregations, Subqueries, Window Functions)
- Python (Pandas, NumPy, Matplotlib, Seaborn)
- Excel (Pivot Tables, VLOOKUP, Data Cleaning)
- **Data Visualization & BI Tools:**
- Power BI (DAX, Data Modeling, Interactive Dashboards)
- **Databases:**
- MySQL
- **Machine Learning:**
- Logistic Regression, Random Forest, KNN, K-Means, Decision Tree
- **Core Analytics Skills:**
- Data Cleaning, EDA, KPI Analysis, Dashboard Design, Business Insights

EXPERIENCE

Data Science Intern
ImagineScript Solution Pvt Ltd, Amravati | 5 Months

- Cleaned and preprocessed large datasets using Python (Pandas, NumPy).
- Performed Exploratory Data Analysis (EDA) to identify patterns and trends.
- Built predictive models using machine learning algorithms.
- Developed interactive dashboards in Power BI to visualize key metrics.
- Used SQL queries to extract and analyze data from MySQL databases.
- Presented analytical insights to support data-driven decision-making.

Projects

Suspicious Transaction Monitoring Dashboard (KYC/AML) – Power BI
• Built a Power BI dashboard to analyze suspicious transactions and identify high-risk customers SQL CASE-based risk scoring logic and DAX measures.
• Used slicers and conditional formatting to support AML investigations and highlight high-risk accounts.

HR Analytics Dashboard – Power BI
• Built a Power BI dashboard to analyze employee attrition and track workforce KPIs, identifying key retention and turnover patterns.

Credit Card Customer Segmentation — ML (K-Means)
• Segmented credit card customers using K-Means clustering based on spending and repayment behavior to generate targeted marketing insights.
• Performed EDA, feature scaling, and the Elbow Method; visualized results using Python.

Education

B.E.in Information Technology – SGBAU (2024), CGPA: 8.0

Class XII – Pri. DIGJC, gobhani, Maharashtra (2020), 66.77%

Class X – Shri Shivaji High School, gobhani, Maharashtra (2018), 73.84%

Certifications

FullStack DataScience & AI – Naresh IT, Hyderabad (2025)
Python – Cadesk, Amravati (2023)
